Release 7 Features and Enhancements

The Release 7 version of the NexPath Telephony Server software adds a number of new features to the NexPath Telephony Server suite of software, including an upgrade of the operating system. These features are documented below:

Basic Switch Operation.

Record Calls	A call can be recorded and saved to a voice mail box. Call recording can be initiated from the telephone keypad or from NexDial™ . Up to 30 voice mail calls, auto-attendant calls, or recorded calls can be done simultaneously. Note: conference calls cannot be recorded.	<i>Release 7</i>
Caller ID Routing	Auto-attendants have expanded caller ID routing capability, with each automated attendant having the capability of a different routing table. A new routing table editor is provided in AdminTool™.	<i>Release 7</i>
Voice Mail Enhancements	<ul style="list-style-type: none">• Enhanced capabilities for sending and replying to messages for intra-office voice mail correspondence.• Voice mail storage is now limited by the hard disk size, not a 2 GB partition. Typical 20 GB disks (new systems) can store more than 500 hours of voice mail.	<i>Release 7</i>

Call Distribution	Call Distribution (in the automated attendant) allows the caller to optionally hear background music instead of a ringing sound when trying extensions in the ACD list.	<i>Release 7</i>
Server OS	The operating system has been upgraded to Embedded Linux for reliability and IT familiarity.	<i>Release 7</i>
AdminTool	<ul style="list-style-type: none">• User passwords can be reset without re-activating the configuration.• A caller ID routing table editor is available for managing caller ID routing tables.	<i>Release 7</i>
Improved installation	Single floppy installation simplifies new software installation.	<i>Release 7</i>
Console Program	The console program (using a VGA compatible monitor and a keyboard) has been extended for ease of use: <ul style="list-style-type: none">• allows setting the time and time zone,• installing license keys,• installation of software upgrades.	<i>Release 7</i>

Client Programs.

Improved NexDial™	NexDial™ client has been enhanced as follows: <ul style="list-style-type: none">• starting and stopping recording of calls• additional “Tool Tip” information boxes to see details of inbound caller ID. Tool Tips are information boxes that appear in yellow when the mouse is hovered over a region of the dialog box.• SMTP login for email notification, where the mail host requires a user name and password to send mail.	<i>Release 7</i>
Improved NexDirector™	<ul style="list-style-type: none">• Improved Tool Tip information boxes have been added to NexDirector™ to allow viewing complete call information where space is limited.	<i>Release 7</i>
